

## Test 1: Menu

**Background:** Customer scans QR code.

1. Customer can see “Menu” and “ Pay” buttons at the centre of the page, “Qlub” logo, “Terms and Conditions” and Language dropdown menu at the bottom of the page.
2. Customer clicks “Menu” button.
3. Customer can see the restaurant logo at the top of the page and list of restaurant menu items under the logo.
4. Customer can see that each of product has title, description and price.
5. Customer can see at the end of each page that there is a warning about “Food Allergy”
6. Customer can change the language of the menu by selecting a language from dropdown menu located at the end of the page.

**Defects 1: Language cannot be changed.**

- **Actual Result:** The menu’s language cannot be changed by selecting different language from dropdown menu located at the end of the menu.
- **Expected Result:** The menu’s language should be changed by selecting different language from dropdown menu located at the end of the menu.

## Test 2: Validation of “Bill” Page

**Background:** Customer scans QR code.

1. Customer can see “Menu” and “ Paying” buttons at the centre of the page, “Qlub” logo, “Terms and Conditions” and Language dropdown menu at the bottom of the page.
2. Customer clicks “Pay” button.
3. Customer can see a section which has Table No, Refresh Button, list of products with quantity and price.
4. Customer can clicks “Refresh” button in order to refresh the bill.
5. Customer can see a section which has total price of the bill, split the bill button and pay the whole bill button.
6. Customer can see a section which has Tips with four button for adding %5, %10 %15 and a Custom button which Customer can enter percentage.
7. Customer can see payment methods and credit card fields.

**Defects 1: Custom tip button does not calculating properly.**

- **Actual Result:** The tip percentage added to the bill is incorrect.
  - Total Bill: 141.00
  - Custom Tip Percentage: 50%
  - Total Bill After Adding Tip: 191.00

- **Expected Result:** The tip percentage should be added to the bill correctly.
  - Total Bill: 141.00
  - Custom Tip Percentage: 50%
  - Total Bill After Adding Tip: 211.5

#### **Defects 2: Table names do not match.**

- **Actual Result:** The table name and the name in the parenthesis do not match.
  - i.e. Masa 36 (Table 4)
- **Expected Result:** The table name and the name in the parenthesis should be matched.
  - i.e. Masa 36 (Table 36)

### **Test 3: Payment Methods**

**Background:** Customer is on the payment page.

1. Customer can see GPay wallet payment button and credit card payment field.
2. Customer clicks GPay wallet payment button and directs to GPay Wallet.
3. Customer fills credit card payment field. Customer gets an error if the card number is invalid.
4. Customer clicks to Pay button.
